-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 26 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Specification***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

**The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words.** It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 6 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Kidokoro et al. (US 2002/0023242 A1).

Regarding claims 1 – 6 and 10, Kidokoro et al. teaches a car control unit including a semiconductor (100) characterized in that the unit has an internal temperature detection unit (85) for detecting (by monitoring) an internal temperature of the unit, a comparison output unit (74B; figs. 2 and 8) for comparing an internal temperature value concerning the detected temperature and outputting a signal when

Art Unit: 3661

the value is higher than a reference value and a controller (5) for controlling the unit so as to maintain safe running of the car according to the output signal (note ¶¶ 0018; 0044; 0050; 0055 at least). Kidokoro et al. further teaches the unit having a relay (100a/100b), a power source (83) for supplying power (0035; 0048), a reset unit (77) for stopping an internal operation of the unit (¶¶ 0035, 0041, 0042).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 and 13 (as applied to claim 1), 11, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kidokoro et al.

As discussed above, Kidokoro et al. teaches all of the limitations except for the explicit recitation of setting the temperature by a resistor and the unit being a two-wheel or four-wheel switching unit; making the unit a throttle control unit and an automatic speed control unit. However, it would have been obvious to one of ordinary skill in the art at the time of the invention setting the temperature by a resistor and the unit being a two-wheel or four-wheel switching unit and a throttle control unit and an automatic speed control unit involves only routine skill in the art.

***Allowable Subject Matter***

Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. A statement of reasons supporting the allowable subject matter will be provided in subsequent Office action(s).

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yonel Beaulieu whose telephone number is (703) 305-4072. The examiner can normally be reached on M-R, from 0900-1600.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas BLACK can be reached on (703) 305-8233. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
